Highlights

Self-driven

I take deadlines seriously and understand the value of time management

Creative

There is always a unique and interesting solution to every problem

Positive

Attitude is everything

Open-minded

Every challenge is a new learning opportunity

Reliable

You can depend on me to follow through on my word

Current Project

Leafit is an iOS and

Android camera app that uses self-teaching image recognition technology to identify photos of leaves.

Users can pick up interesting leaves and access useful information about the plants and trees that they come from.

Education

BS, Computer Information Science

University of Oregon, May 2019

BA, English Literature

University of San Diego, May 2013

Teaching English as a Foreign Language (TEFL) Certificate

University of California, San Diego, Sept 2014

Experience

Business Development Intern, Marvel Entertainment — 2013

Coordinated media assets and editorial production schedules for senior staff. Contributed research and draft materials for the 2014 "All-New Marvel NOW!" ad campaign. Wrote creative content for promotional trading cards and animated YouTube teasers.

Video Production Intern, KPBS — 2013

Assisted in the production of KPBS Evening Edition, a televised news broadcast based in San Diego. Operated studio cameras, audio equipment, lighting mounts and many other tools during live and recorded segments.

Opinion Editor, The Vista Student Newspaper — 2012

Assigned story pitches to writers and directly oversaw collaborative editing process. Designed a five-page section from articles, graphics, and advertisements using Adobe InDesign.

Editorial Intern, San Diego Magazine — 2012

Wrote for and edited the magazine's online blog using the Rivista CMS. Researched and cataloged local businesses in order to keep advertisement slots up-to-date.
